

Migrating to Microsoft® Visual Basic® .NET

with Shannon Horn

This course will explain many of the changes that have been implemented as well as analyze how to upgrade code and forms developed using Visual Basic 6.0 to Visual Basic .NET. This includes code that utilizes data access and the new version of ActiveX Data Objects, ADO.NET.

What Is .NET?

- The Need for .NET
- Problems with the Current Design
- An Overview of .NET
- The Components
- Visual Studio .NET

An Overview of Visual Basic .NET

- A New Life for Visual Basic
- New Concepts in .NET

Migrating: Data Access Technologies

- Data Access Options
- ADO.NET: The New Standard
- Using the Visual Basic Upgrade Wizard

Migrating: Business Logic and Code Changes

- New Object-Oriented (OO) Features
- New Command and Code Functionality
- The New Threading Model
- What about Those Errors?

Migrating: User Interface

- User Interfaces of the Past
- Options Under .NET
- What Are WinForms?
- What Are WebForms?

This course includes 9+ hours of total training time...	
<ul style="list-style-type: none"> • 3+ hours of media run time • 150+ pages of printable courseware • Step-by-step hands-on lab exercises • Pre/post exams • Sample code 	
YOUR CHOICE OF FORMATS:	
CD-ROM	2 CDs
